

SUMMARY

Software Developer with 3+ years of experience building scalable UIs using ReactJS, JavaScript. Skilled in converting Figma designs to code, implementing theme systems, and optimizing SEO with semantic markup. Experienced in handling multiple projects across HRMS, e-commerce, and AI/ML-based platforms, collaborating with cross-functional teams using Git, Jira, and modern agile workflows.

SKILLS

React JS, Redux, MUI, JavaScript, Node JS, Express JS, MongoDB, GraphQL, Rest API, TailwindCSS, Bootstrap, HTML, CSS, SCSS, Git

EXPERIENCE

Intelegencia Analytics Pvt. Ltd. Noida, Uttar Pradesh (Software Developer II)

Dec 2024 - Present

Tech Stack: ReactJS, Redux, JavaScript, SCSS, Bootstrap, TailwindCSS, Node JS, Express JS, MongoDB, Jira, GitLab

- **HRMS Web Application (In-house Product)**
 - Spearheaded the frontend development of an internal Human Resource Management System designed to replace a costly third-party subscription used by the company’s Philippines branch (2500+ employees), saving millions in annual expenses.
 - Implemented Dark/Light Mode theming across the platform using SCSS and JavaScript, ensuring seamless user preference switching.
 - Built reusable and modular components in ReactJS, integrated with Laravel APIs, and used Bootstrap for rapid UI layout support.
 - Contributed to the goal of commercializing the HRMS product for external B2B subscription-based use.
- **Pfeifer & CIC Web Applications (Client Projects – Mexico-based)**
 - Contributed to two major Magento-based e-commerce platforms serving retail hardware clients dealing in paints, screws, and other construction-related materials.
 - Collaborated directly with international clients to understand their UI/UX expectations, address real-time queries, and deliver pixel-perfect solutions aligned with business goals.
 - Played a key role in UI improvements, enhancing user workflows and visual consistency across the web apps.
 - Prioritized cross-browser compatibility and responsiveness to ensure seamless experience across devices and platforms.
 - Regularly participated in client calls to demonstrate features, gather feedback, and refine implementations iteratively.

Kludrac Softwares Pvt. Ltd. Noida, Uttar Pradesh (Frontend Developer)

April 2024 - Dev 2024

Tech Stack: ReactJS, JavaScript, HTML5, CSS3, Node JS, Express JS, MongoDB, Git, Jira, Figma

- Worked on a payroll contract for **HT Digital Streams (Hindustaan Times' IT Division)**, managing the frontend development of three high-traffic digital platforms:
 - **Hindustaan Times, HT Auto, and LiveMint.**
- Efficiently handled simultaneous development and UI maintenance across all three platforms, showcasing strong multitasking and project ownership skills.
- Translated Figma designs into clean, responsive JSX components, ensuring pixel-perfect implementation of UI elements across devices.
- Collaborated closely with UI/UX designers, scrum masters, and cross-functional teams (total team size: ~10–12 members per project) in an Agile/Scrum environment.
- Implemented theme systems and worked on various frontend features, ensuring consistency and performance optimization.
- Actively used Git for version control, Jira for task management, and Google Workspace for coordination and documentation.

Alethe Labs India Pvt. Ltd. Gurugram, Haryana (UI Developer)

Aug 2023 - April 2024

Tech Stack: ReactJS, Redux, JavaScript, HTML5, CSS3, Bootstrap, Git, Jira

- Contributed to AI/ML-driven government projects focused on pipeline collision and leakage detection systems for major clients like **IOCL (Indian Oil Corporation Limited)**.
- Developed dynamic data visualization interfaces, including interactive tables, graphs, and maps, to interpret pipeline sensor data collected from devices like PIGs (Pipeline Inspection Gauges).
- Collaborated with AI/ML engineers, designers, and QAs to deliver clean, user-friendly UI solutions for complex industrial datasets.
- Participated in UI migration, redesign, and bug fixing, ensuring consistent and modern interfaces aligned with government usability standards.
- Frequently coordinated with field engineers and visited client sites (IOCL offices) to understand the domain requirements and validate data representation accuracy.
- Achieved multiple project milestones under tight deadlines, contributing to enhanced data readability and decision-making interfaces.
- Worked in a team of 15–20 members using Agile methodology, Git for version control, Jira for sprint planning, and Microsoft 365 Suite for collaboration and documentation.

E Global Soft Solutions, Delhi, India (UI/UX Developer)

Jan 2022 - Aug 2023

Tech Stack: ReactJS, JavaScript, HTML5, CSS3, Bootstrap, TailwindCSS, jQuery, MUI, Git, Jira

- Developed and maintained four customer support-focused websites, working closely with cross-functional teams including SEO specialists, designers, QAs, and Laravel backend developers.
- Integrated client-side form validation for contact and feedback forms, enhancing user input accuracy and reducing backend errors.
- Wrote semantic, SEO-optimized HTML/CSS, contributing to a 40%+ increase in page views and improved search engine visibility.
- Regularly fixed frontend bugs, contributed to UI enhancement cycles
- Collaborated in a 7–8 member team, using Git for version control, Jira for task tracking, and Google Workspace for team communication and documentation.

EDUCATION

Bachelor of Technology (Computer Science) 6.8 CGPA
Meerut Institute of Technology, Meerut, Uttar Pradesh (2019 - 2023)
